

# Make a Milk Bottle Scoop

1. Get an empty plastic milk bottle. Give it a rinse and remove the label.

2. Use a permanent marker to mark where you want to cut your scoop. Use this picture as a guide.

3. Use a craft knife or scissors to carefully cut along the line. Pop the bottom of the bottle in your plastic recycling bin. Use the other bit as your scoop!

**Why not decorate your scoop with permanent pens or stickers, then use it in the garden or as a pet food scoop...**
